Quick Guide to the Map Room & its Collections

- Cambridge University Library Map Department has over 1.3 million maps of all parts of the world dating from the 15th century to the present. We also have atlases, views, gazetteers and books on cartography. We are constantly adding new and older material to the collection.

- Maps are covered by legal deposit so CUL should receive a copy of everything published in Great Britain, though things do fall through the net!

- Only a small proportion of our collection is catalogued online so you need to check [iDiscover](https://idiscovers.cam.ac.uk) (the Library’s online catalogue), [ArchiveSearch](https://archivesearch.cam.ac.uk) (the University’s archive catalogue), and the Map Department’s card catalogue to find out what we have. For more information on our catalogues see [www.lib.cam.ac.uk/collections/departments/maps/finding-maps](http://www.lib.cam.ac.uk/collections/departments/maps/finding-maps)

  Note that:
  - The card catalogue is arranged in one alphabetical sequence by the place covered by the map.
  - Individual maps in atlases and those in map series are not catalogued separately.
  - All of the letters and numbers, plus the punctuation (including hyphens), in classmarks are important!

- There are very few items on open access in the Map Room so for most items you will need to fill in an order form so that staff can fetch the items for you. There is No Borrowing of maps.

- The Map Room is open for a shorter time than the rest of the Library – we are not open in the evenings, at lunch time (12.45 to 2pm) or on Saturdays (although pre-ordered items can be transferred to the Rare Books Reading Room).

- You can use your own camera to take photographs of items in the collection for private research purposes, but not for publication (and no flash, tripods or camera noise!). The Library’s Digital Content Unit can also make reproductions for you.

- Pencils only may be used in the Map Room – no pens! We can lend you a pencil if you forget to bring one.

- To protect maps we try not to touch their surface and so place plastic sheets over them when close study is required.

You might like to know:

- Before the advent of Ordnance Survey in 1791, mapping was a very local activity often at estate or county level. Some areas are well mapped, others less so. Older maps tend to be less detailed and, the further back you go, more pictorial.

- There are maps in other parts of CUL – most notably in the Manuscripts and Rare Books Departments and in the University Archives – and in other parts of the University, especially the Colleges.

For More Information:

- Ask a member of staff in person, by phone, letter or email:-
  Map Department, Cambridge University Library, West Road, Cambridge, CB3 9DR
  Tel: 01223 333041 ; Email: maps@lib.cam.ac.uk

- Cartographic Resources LibGuide [https://libguides.cam.ac.uk/cartographic_resources](https://libguides.cam.ac.uk/cartographic_resources)

- Perhaps one of our Information Sheets will help. They cover subjects such as searching for maps in CUL’s catalogues, locations of other map libraries, where to buy maps, etc. They are available in the Map Room or online at [www.lib.cam.ac.uk/collections/departments/maps/information-sheets](http://www.lib.cam.ac.uk/collections/departments/maps/information-sheets)

- Take a look at our web pages at [www.lib.cam.ac.uk/collections/departments/maps](http://www.lib.cam.ac.uk/collections/departments/maps), especially the Links page at [www.lib.cam.ac.uk/collections/departments/maps/links](http://www.lib.cam.ac.uk/collections/departments/maps/links)

Key Material Types in the Map Department

| Manuscript Maps | The Map Department has many manuscript maps, some of which are viewable on CUDL (https://cudl.lib.cam.ac.uk/collections/maps/1), and there are more in the Manuscripts Department of CUL. We also have reproductions of manuscript maps held elsewhere. |
### Web Sites

- Library Hub Discover: [https://discover.libraryhub.jisc.ac.uk](https://discover.libraryhub.jisc.ac.uk)
- Map History / History of Cartography Website: [www.maphistory.info/](http://www.maphistory.info/)

### Reference Books

For example: Books on the history of map making, including those on a specific place; Lists of maps of various areas, e.g. countries, counties, towns; Lists of maps of certain types, e.g. manuscript or town maps (usually of a specific area); Gazetteers; Dictionaries of mapmakers and cartographic terms …

### Views

The Map Department has some topographic views including a large collection of postcards.

### Notes

- Usually, the largest collection of manuscript maps of any locality is in the local record/archives office, and don’t forget about The National Archives in Kew.

<table>
<thead>
<tr>
<th>Category</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Town Plans</strong></td>
<td>Good selection in CUL. Modern town plans are not always catalogued – ask a member of staff.</td>
</tr>
<tr>
<td><strong>County Maps</strong></td>
<td>Before the OS got going printed maps tended to be less detailed than we expect today. A list of some ‘large scale’ county maps (often at a scale of 1&quot; to 1 mile; mostly pre-OS; CUL has a good selection) can be found in The large scale county maps of the British Isles, 1596-1850: a union list, compiled by Elizabeth M. Rodger and published in 1972 (S696.c.97.39). Because the counties were mapped independently by cartographers, not all counties have been mapped, have the same type of maps and not all are of the same quality.</td>
</tr>
<tr>
<td><strong>Road Books &amp; Maps</strong></td>
<td>Road Books are lists of places along roads, with distances and sometimes other information. CUL has a good selection. Roads first appeared on printed English county maps in the late 16th century. Ogilby’s 1675 atlas marked the first systematic survey of British roads.</td>
</tr>
<tr>
<td><strong>Ordnance Survey (OS) Maps</strong></td>
<td>With the exception of the oldest, most detailed scales – some 1:2,500 (25”) and 1:500 scale maps from the late 1800’s – CUL should have a copy of every OS map ever published. There are exceptions but we do have a lot of them! Some OS maps can also be viewed on the National Library of Scotland’s website at <a href="http://maps.nls.nl.uk/os/index.html">http://maps.nls.nl.uk/os/index.html</a> and/or <a href="https://maps.nls.uk/">https://maps.nls.uk/</a>. For the most detailed maps there are two numbering systems: County Series (up to WWII) and National Grid (after WWII). For most areas there will be several editions of the maps but the dates may vary widely between neighbouring sheets. The most recent, most detailed maps can only be viewed online in the Map Room. Public libraries may also be able to provide online access to the most recent OS maps for their local area. Or, if you are a student or member of staff at the University take a look at <a href="https://digimap.lib.cam.ac.uk/">Digimap</a>, an online service providing current and historic mapping: <a href="http://www.lib.cam.ac.uk/collections/departments/maps/digimap">www.lib.cam.ac.uk/collections/departments/maps/digimap</a>. The Ordnance Surveyors’ Drawings, 1789-c1840, are manuscript maps from which the earliest 1:63,360 (1&quot; to 1 mile) maps were derived. The Map Department has black and white facsimiles of some of these. The originals are in the British Library and colour images can be seen at <a href="https://commons.wikimedia.org/wiki/Category:Ordnance_Survey_Drawings">https://commons.wikimedia.org/wiki/Category:Ordnance_Survey_Drawings</a>. The Charles Close Society for the Study of Ordnance Survey Maps website and publications are good places to go for more information on OS mapping <a href="http://www.charlesclosesociety.org/">www.charlesclosesociety.org/</a>.</td>
</tr>
<tr>
<td><strong>Aerial Photographs</strong></td>
<td>CUL has some 1:10,560 air photo mosaics produced by OS just after WWII (1944-1950), but only parts of Great Britain are covered. For some urban areas there are also 1:1,250 photographs. CUL has paper copies but they are also available to view on the National Library of Scotland website at <a href="http://maps.nls.nl.uk/os/air-photos/">http://maps.nls.nl.uk/os/air-photos/</a>. The National Collection of Aerial Photography (NCAP) is a great source of air photos <a href="http://maps.nls.uk/os/index.html">http://maps.nls.uk/os/index.html</a>. The most recent, most detailed maps can only be viewed online in the Map Room. Public libraries may also be able to provide online access to the most recent OS maps for their local area. Or, if you are a student or member of staff at the University take a look at <a href="https://digimap.lib.cam.ac.uk/">Digimap</a>, an online service providing current and historic mapping: <a href="http://www.lib.cam.ac.uk/collections/departments/maps/digimap">www.lib.cam.ac.uk/collections/departments/maps/digimap</a>. The Ordnance Surveyors’ Drawings, 1789-c1840, are manuscript maps from which the earliest 1:63,360 (1&quot; to 1 mile) maps were derived. The Map Department has black and white facsimiles of some of these. The originals are in the British Library and colour images can be seen at <a href="https://commons.wikimedia.org/wiki/Category:Ordnance_Survey_Drawings">https://commons.wikimedia.org/wiki/Category:Ordnance_Survey_Drawings</a>. The Charles Close Society for the Study of Ordnance Survey Maps website and publications are good places to go for more information on OS mapping <a href="http://www.charlesclosesociety.org/">www.charlesclosesociety.org/</a>.</td>
</tr>
<tr>
<td><strong>Particulars of Sale</strong></td>
<td>These are documents produced when houses / estates etc. were sold. Some are just text – especially the older ones – others include photographs and/or maps. Most are 19th/20th century. We have several thousand of these – look in iDiscover, the card catalogue, and on ArchiveSearch (at <a href="https://archivesearch.lib.cam.ac.uk/repositories/2/resources/1180">https://archivesearch.lib.cam.ac.uk/repositories/2/resources/1180</a>) to find them. See also the blog at <a href="https://specialcollections-blog.lib.cam.ac.uk/?p=11824">https://specialcollections-blog.lib.cam.ac.uk/?p=11824</a>.</td>
</tr>
<tr>
<td><strong>Goad Fire Insurance Plans</strong></td>
<td>CUL has only one example of this sort of plan (Liverpool wharves). The British Library Map Library has a comprehensive set and these are available online at <a href="https://commons.wikimedia.org/wiki/Category:Goad_fire_insurance_maps_of_England">https://commons.wikimedia.org/wiki/Category:Goad_fire_insurance_maps_of_England</a>. They also own the archive of Chas E. Goad Ltd 1899-1972 (letter books, correspondence, etc.).</td>
</tr>
<tr>
<td><strong>Thematic Mapping &amp; Hydrographic Charts</strong></td>
<td>We actively collect National atlases (they usually include thematic maps, often difficult to obtain elsewhere) and also, where possible, acquire thematic maps (geology, soil, land-use, etc., etc.) plus, for example, linguistic atlases. We also have a large collection of UK Hydrographic Office charts covering all parts of the world.</td>
</tr>
<tr>
<td><strong>Topographic Mapping</strong></td>
<td>We try to collect for all parts of the world at a scale of at least 1:250,000 though for many areas we have much more detailed mapping. The Soviet military maps are an important source of topographic information, especially for areas where local mapping is not publicly available. See <a href="https://www.sovietmaps.com/">https://www.sovietmaps.com/</a> for some background information.</td>
</tr>
<tr>
<td><strong>Railway Maps, etc.</strong></td>
<td>We have a large collection of railway maps, plans and diagrams of track layouts, buildings, structures, etc. Mostly listed on ArchiveSearch <a href="https://archivesearch.lib.cam.ac.uk/repositories/2/resources/1181">https://archivesearch.lib.cam.ac.uk/repositories/2/resources/1181</a>. See also the blog post at <a href="https://specialcollections-blog.lib.cam.ac.uk/?p=18766">https://specialcollections-blog.lib.cam.ac.uk/?p=18766</a>.</td>
</tr>
<tr>
<td><strong>Views</strong></td>
<td>The Map Department has some topographic views including a large collection of postcards.</td>

| **Aerial Photographs** | CUL has some 1:10,560 air photo mosaics produced by OS just after WWII (1944-1950), but only parts of Great Britain are covered. For some urban areas there are also 1:1,250 photographs. CUL has paper copies but they are also available to view on the National Library of Scotland website at http://maps.nls.uk/os/air-photos/. The National Collection of Aerial Photography (NCAP) is a great source of air photos https://ncap.org.uk/ See also the small selection on CUDL at https://cudl.lib.cam.ac.uk/collections/landscapehistories/1 |
| **Particulars of Sale** | These are documents produced when houses / estates etc. were sold. Some are just text – especially the older ones – others include photographs and / or maps. Most are 19th/20th century. We have several thousand of these – look in iDiscover, the card catalogue, and on ArchiveSearch (at https://archivesearch.lib.cam.ac.uk/repositories/2/resources/1180) to find them. See also the blog at https://specialcollections-blog.lib.cam.ac.uk/?p=11824 |
| **Goad Fire Insurance Plans** | CUL has one example of this sort of plan (Liverpool wharves). The British Library Map Library has a comprehensive set and these are available online at https://commons.wikimedia.org/wiki/Category:Goad_fire_insurance_maps_of_England. They also own the archive of Chas E. Goad Ltd 1899-1972 (letter books, correspondence, etc.). |
| **Thematic Mapping & Hydrographic Charts** | We actively collect National atlases (they usually include thematic maps, often difficult to obtain elsewhere) and also, where possible, acquire thematic maps (geology, soil, land-use, etc., etc.) plus, for example, linguistic atlases. We also have a large collection of UK Hydrographic Office charts covering all parts of the world. |
| **Topographic Mapping** | We try to collect for all parts of the world at a scale of at least 1:250,000 though for many areas we have much more detailed mapping. The Soviet military maps are an important source of topographic information, especially for areas where local mapping is not publicly available. See https://www.sovietmaps.com/ for some background information. |
| **Railway Maps, etc.** | We have a large collection of railway maps, plans and diagrams of track layouts, buildings, structures, etc. Mostly listed on ArchiveSearch https://archivesearch.lib.cam.ac.uk/repositories/2/resources/1181 See also the blog post at https://specialcollections-blog.lib.cam.ac.uk/?p=18766 |
| **Views** | The Map Department has some topographic views including a large collection of postcards. |
| **Reference Books** | For example: Books on the history of map making, including those on a specific place; Lists of maps of various areas, e.g. countries, counties, towns; Lists of maps of certain types, e.g. manuscript or town maps (usually of a specific area); Gazetteers; Dictionaries of mapmakers and cartographic terms … |
| **Web Sites** | Library Hub Discover https://discover.libraryhub.jisc.ac.uk In a single search you can discover (some of the) holdings of the UK’s National Libraries (including the British Library) and of many university libraries and specialist research libraries. Map History / History of Cartography Website www.maphistory.info/ Lots of invaluable information on, e.g. conferences, talks and exhibitions, fellowships and prizes, map collecting and collections, map catalogues, email discussion lists, societies, thefts, forgeries, links to images of early maps, and much more. Includes section entitled Books to get you into the Subject at www.maphistory.info/litgen.html |
**Quick Guide to the Map Room & its Collections**

- **Cambridge University Library Map Department** has over 1.3 million maps of all parts of the world dating from the 15th century to the present. We also have atlases, views, gazetteers and books on cartography. We are constantly adding new and older material to the collection.

- Maps are covered by **legal deposit** so CUL should receive a copy of everything published in Great Britain, though things do fall through the net!

- Only a small proportion of our collection is catalogued online so you need to check [iDiscover](https://cudl.lib.cam.ac.uk/collections/maps/1) (the Library's online catalogue), [ArchiveSearch](https://libguides.cam.ac.uk/cartographic_resources) (the University's archive catalogue), and the Map Department’s **card catalogue** to find out what we have. For more information on our catalogues see [www.lib.cam.ac.uk/collections/departments/maps/finding-maps](http://www.lib.cam.ac.uk/collections/departments/maps/finding-maps).

  Note that:
  - The card catalogue is arranged in one alphabetical sequence by the place covered by the map.
  - Individual maps in atlases and those in map series are not catalogued separately.
  - All of the letters and numbers, plus the punctuation (including hyphens), in classmarks are important!

- There are very few items on open access in the Map Room so for most items you will need to fill in an **order form** so that staff can fetch the items for you. There is **No Borrowing** of maps.

- The Map Room is **open for a shorter time** than the rest of the Library – we are not open in the evenings, at lunch time (12.45 to 2pm) or on Saturdays (although pre-ordered items can be transferred to the Rare Books Reading Room).

- You can use your own camera to **take photographs** of items in the collection for private research purposes, but not for publication (and no flash, tripods or camera noise!). The Library’s Digital Content Unit can also make reproductions for you.

- **Pencils only** may be used in the Map Room – no pens! We can lend you a pencil if you forget to bring one.

- To **protect maps** we try not to touch their surface and so place plastic sheets over them when close study is required.

**You might like to know:**

- Before the advent of Ordnance Survey in 1791, mapping was a very local activity often at estate or county level. Some areas are well mapped, others less so. Older maps tend to be less detailed and, the further back you go, more pictorial.

- There are maps in other parts of CUL – most notably in the Manuscripts and Rare Books Departments and in the University Archives – and in other parts of the University, especially the Colleges.

**For More Information:**

- **Ask** a member of staff in person, by phone, letter or email:-
  Map Department, Cambridge University Library, West Road, Cambridge, CB3 9DR
  Tel: 01223 333041 ; Email: maps@lib.cam.ac.uk

- **Cartographic Resources LibGuide** https://libguides.cam.ac.uk/cartographic_resources

- **Perhaps one of our Information Sheets** will help. They cover subjects such as searching for maps in CUL’s catalogues, locations of other map libraries, where to buy maps, etc. They are available in the Map Room or online at [www.lib.cam.ac.uk/collections/departments/maps/information-sheets](http://www.lib.cam.ac.uk/collections/departments/maps/information-sheets)

- **Take a look at our web pages** at [www.lib.cam.ac.uk/collections/departments/maps](http://www.lib.cam.ac.uk/collections/departments/maps), especially the Links page at [www.lib.cam.ac.uk/collections/departments/maps/links](http://www.lib.cam.ac.uk/collections/departments/maps/links)

**Key Material Types in the Map Department**

<table>
<thead>
<tr>
<th>Manuscript Maps</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Map Department has many manuscript maps, some of which are viewable on CUDL <a href="https://cudl.lib.cam.ac.uk/collections/maps/1">https://cudl.lib.cam.ac.uk/collections/maps/1</a>, and there are more in the Manuscripts Department of CUL. We also have reproductions of manuscript maps held elsewhere.</td>
</tr>
</tbody>
</table>
Usually, the largest collection of manuscript maps of any locality is in the local record/archives office, and don't forget about The National Archives in Kew.

**Town Plans**

Good selection in CUL. Modern town plans are not always catalogued – ask a member of staff.

---

**County Maps**

Before the OS got going printed maps tended to be less detailed than we expect today. A list of some ‘large scale’ county maps (often at a scale of 1” to 1 mile; mostly pre-OS; CUL has a good selection) can be found in *The large scale county maps of the British Isles, 1596-1850: a union list*, compiled by Elizabeth M. Rodger and published in 1972 (S696.c.97.39).

Because the counties were mapped independently by cartographers, not all counties have been mapped, have the same type of maps and not all are of the same quality.

---

**Road Books & Maps**

Road Books are lists of places along roads, with distances and sometimes other information. CUL has a good selection. Roads first appeared on printed English county maps in the late 16th century. Ogilby’s 1675 atlas marked the first systematic survey of British roads.

---

**Ordnance Survey (OS) Maps**

With the exception of the oldest, most detailed scales – some 1:2,500 (25”) and 1:500 scale maps from the late 1800’s – CUL should have a copy of every OS map ever published. There are exceptions but we do have a lot of them! Some OS maps can also be viewed on the National Library of Scotland’s website at http://maps.nls.gov.uk/os/index.html and/or https://maps.nls.gov.uk/ For the most detailed maps there are two numbering systems: County Series (up to WWII) and National Grid (after WWII). For most areas there will be several editions of the maps but the dates may vary widely between neighbouring sheets.

The most recent, most detailed maps can only be viewed online in the Map Room. Public libraries may also be able to provide online access to the most recent OS maps for their local area. Or, if you are a student or member of staff at the University take a look at Digimap, an online service providing current and historic mapping: www.lib.cam.ac.uk/collections/departments/maps/digimap

The Ordnance Surveyors’ Drawings, 1789-c1840, are manuscript maps from which the earliest 1:63,360 (1” to 1 mile) maps were derived. The Map Department has black and white facsimiles of some of these. The originals are in the British Library and colour images can be seen at https://commons.wikimedia.org/wiki/Category:Ordnance_Survey_Drawings

The Charles Close Society for the Study of Ordnance Survey Maps website and publications are good places to go for more information on OS mapping. www.charlesclosesociety.org/.

---

**Aerial Photographs**

CUL has some 1:10,560 air photo mosaics produced by OS just after WWII (1944-1950), but only parts of Great Britain are covered. For some urban areas there are also 1:1,250 photographs. CUL has paper copies but they are also available to view on the National Library of Scotland website at http://maps.nls.gov.uk/os/air-photos/. The National Collection of Aerial Photography (NCAP) is a great source of air photos https://ncap.org.uk/ See also the small selection on CUDL at https://cudl.lib.cam.ac.uk/collections/landscapehistories/1

Key Material Types in the Map Department

| Manuscript Maps | The Map Department has many manuscript maps, some of which are viewable on CUDL https://cudl.lib.cam.ac.uk/collections/maps/1, and there are more in the Manuscripts Department of CUL. We also have reproductions of manuscript maps held elsewhere. |
| Town Plans | Good selection in CUL. Modern town plans are not always catalogued – ask a member of staff |
| County Maps | Before the OS got going printed maps tended to be less detailed than we expect today. A list of some ‘large scale’ county maps (often at a scale of 1” to 1 mile; mostly pre-OS; CUL has a good selection) can be found in *The large scale county maps of the British Isles, 1596-1850: a union list*, compiled by Elizabeth M. Rodger and published in 1972 (S696.c.97.39). Because the counties were mapped independently by cartographers, not all counties have been mapped, have the same type of maps and not all are of the same quality. |
| Road Books & Maps | Road Books are lists of places along roads, with distances and sometimes other information. CUL has a good selection. Roads first appeared on printed English county maps in the late 16th century. Ogilby’s 1675 atlas marked the first systematic survey of British roads |
| Ordnance Survey (OS) Maps | With the exception of the oldest, most detailed scales – some 1:2,500 (25”) and 1:500 scale maps from the late 1800’s – CUL should have a copy of every OS map ever published. There are exceptions but we do have a lot of them! Some OS maps can also be viewed on the National Library of Scotland’s website at [http://maps.nls.uk/os/index.html](http://maps.nls.uk/os/index.html) and/or [https://maps.nls.uk/](https://maps.nls.uk/). For the most detailed maps there are two numbering systems: County Series (up to WWII) and National Grid (after WWII). For most areas there will be several editions of the maps but the dates may vary widely between neighbouring sheets. The most recent, most detailed maps can only be viewed online in the Map Room. Public libraries may also be able to provide online access to the most recent OS maps for their local area. Or, if you are a student or member of staff at the University take a look at [Digimap](https://www.digimap.org.uk), an online service providing current and historic mapping: [www.lib.cam.ac.uk/collections/departments/maps/digimat](http://www.lib.cam.ac.uk/collections/departments/maps/digimat). The Ordnance Surveyors’ Drawings, 1789-c1840, are manuscript maps from which the earliest 1:63,360 (1” to 1 mile) maps were derived. The Map Department has black and white facsimiles of some of these. The originals are in the British Library and colour images can be seen at [https://commons.wikimedia.org/wiki/Category:Ordnance_Survey_Drawings](https://commons.wikimedia.org/wiki/Category:Ordnance_Survey_Drawings). The Charles Close Society for the Study of Ordnance Survey Maps website and publications are good places to go for more information on OS mapping [www.charlesclosesociety.org/](http://www.charlesclosesociety.org/). |
| Aerial Photographs | CUL has some 1:10,560 air photo mosaics produced by OS just after WWII (1944-1950), but only parts of Great Britain are covered. For some urban areas there are also 1:1,250 photographs. CUL has paper copies but they are also available to view on the National Library of Scotland website at [http://maps.nls.uk/os/air-photos/](http://maps.nls.uk/os/air-photos/). The National Collection of Aerial Photography (NCAP) is a great source of air photos [https://ncap.org.uk/](https://ncap.org.uk/) See also the small selection on CUDL at [https://cudl.lib.cam.ac.uk/collections/landscapehistories/](https://cudl.lib.cam.ac.uk/collections/landscapehistories/). |
| Particulars of Sale | These are documents produced when houses / estates etc. were sold. Some are just text – especially the older ones – others include photographs and / or maps. Most are 19th/20th century. We have several thousand of these – look in iDiscover, the card catalogue, and on ArchiveSearch (at [https://archivesearch.lib.cam.ac.uk/repositories/2/resources/1180](https://archivesearch.lib.cam.ac.uk/repositories/2/resources/1180)) to find them. | Goad Fire Insurance Plans | CUL has only one example of this sort of plan (Liverpool wharves). The British Library Map Library has a comprehensive set and these are available online at [https://commons.wikimedia.org/wiki/Category:Goad_fire_insurance_maps_of_England](https://commons.wikimedia.org/wiki/Category:Goad_fire_insurance_maps_of_England). They also own the archive of Chas E. Goad Ltd 1899-1972 (letter books, correspondence, etc.). |
| Thematic Mapping & Hydrographic Charts | We actively collect National atlases (they usually include thematic maps, often difficult to obtain elsewhere) and also, where possible, acquire thematic maps (geology, soil, land-use, etc., etc.) plus, for example, linguistic atlases. We also have a large collection of UK Hydrographic Office charts covering all parts of the world. |
| Topographic Mapping | We try to collect for all parts of the world at a scale of at least 1:250,000 though for many areas we have much more detailed mapping. The Soviet military maps are an important source of topographic information, especially for areas where local mapping is not publicly available. See [https://www.sovietmaps.com/](https://www.sovietmaps.com/) for some background information. |
| Railway Maps, etc. | We have a large collection of railway maps, plans and diagrams of track layouts, buildings, structures, etc. Mostly listed on ArchiveSearch [https://archivesearch.lib.cam.ac.uk/repositories/2/resources/1181](https://archivesearch.lib.cam.ac.uk/repositories/2/resources/1181). See also the blog post at [https://specialcollections-blog.lib.cam.ac.uk/?p=18766](https://specialcollections-blog.lib.cam.ac.uk/?p=18766). |
| Views | The Map Department has some topographic views including a large collection of postcards. |
| Reference Books | For example: Books on the history of map making, including those on a specific place; Lists of maps of various areas, e.g. countries, counties, towns; Lists of maps of certain types, e.g. manuscript or town maps (usually of a specific area); Gazetteers; Dictionaries of mapmakers and cartographic terms … |
| Web Sites | [Library Hub Discover](https://discover.libraryhub.jisc.ac.uk) In a single search you can discover (some of the) holdings of the UK’s National Libraries (including the British Library) and of many university libraries and specialist research libraries. [Map History / History of Cartography Website](http://www.maphistory.info/) Lots of invaluable information on, e.g. conferences, talks and exhibitions, fellowships and prizes, map collecting and collections, map catalogues, email discussion lists, societies, thefts, forgeries, links to images of early maps, and much more. Includes section entitled *Books to get you into the Subject* at [www.maphistory.info/litgen.html](http://www.maphistory.info/litgen.html). |
Quick Guide to the Map Room & its Collections

- **Cambridge University Library Map Department** has over 1.3 million maps of all parts of the world dating from the 15th century to the present. We also have atlases, views, gazetteers and books on cartography. We are constantly adding new and older material to the collection.

- Maps are covered by **legal deposit** so CUL should receive a copy of everything published in Great Britain, though things do fall through the net!

- Only a small proportion of our collection is catalogued online so you need to check [iDiscover](https://idiscover.lib.cam.ac.uk) (the Library’s online catalogue), [ArchiveSearch](https://archivesearch.lib.cam.ac.uk) (the University’s archive catalogue), and the Map Department’s **card catalogue** to find out what we have. For more information on our catalogues see [www.lib.cam.ac.uk/collections/departments/maps/finding-maps](http://www.lib.cam.ac.uk/collections/departments/maps/finding-maps)

  Note that:
  - The card catalogue is arranged in one alphabetical sequence by the place covered by the map.
  - Individual maps in atlases and those in map series are not catalogued separately.
  - All of the letters and numbers, plus the punctuation (including hyphens), in classmarks are important!

- There are very few items on open access in the Map Room so for most items you will need to fill in an **order form** so that staff can fetch the items for you. There is **No Borrowing** of maps.

- The Map Room is **open for a shorter time** than the rest of the Library – we are not open in the evenings, at lunch time (12.45 to 2pm) or on Saturdays (although pre-ordered items can be transferred to the Rare Books Reading Room).

- You can use your own camera to **take photographs** of items in the collection for private research purposes, but not for publication (and no flash, tripods or camera noise!). The Library’s Digital Content Unit can also make reproductions for you.

- **Pencils only** may be used in the Map Room – no pens! We can lend you a pencil if you forget to bring one.

- To **protect maps** we try not to touch their surface and so place plastic sheets over them when close study is required.

**You might like to know:**

- Before the advent of Ordnance Survey in 1791, mapping was a very local activity often at estate or county level. Some areas are well mapped, others less so. Older maps tend to be less detailed and, the further back you go, more pictorial.

- There are maps in other parts of CUL – most notably in the Manuscripts and Rare Books Departments and in the University Archives – and in other parts of the University, especially the Colleges.

**For More Information:**

- **Ask** a member of staff in person, by phone, letter or email:-
  Map Department, Cambridge University Library, West Road, Cambridge, CB3 9DR
  Tel: 01223 333041 ; Email: maps@lib.cam.ac.uk

- Cartographic Resources **LibGuide** [https://libguides.cam.ac.uk/cartographic_resources](https://libguides.cam.ac.uk/cartographic_resources)

- Perhaps one of our **Information Sheets** will help. They cover subjects such as searching for maps in CUL’s catalogues, locations of other map libraries, where to buy maps, etc. They are available in the Map Room or online at [www.lib.cam.ac.uk/collections/departments/maps/information-sheets](http://www.lib.cam.ac.uk/collections/departments/maps/information-sheets)

- Take a look at our **web pages** at [www.lib.cam.ac.uk/collections/departments/maps](http://www.lib.cam.ac.uk/collections/departments/maps), especially the Links page at [www.lib.cam.ac.uk/collections/departments/maps/links](http://www.lib.cam.ac.uk/collections/departments/maps/links)

**Key Material Types in the Map Department**

| Manuscript Maps | The Map Department has many manuscript maps, some of which are viewable on CUDL [https://cudl.lib.cam.ac.uk/collections/maps/1](https://cudl.lib.cam.ac.uk/collections/maps/1), and there are more in the Manuscripts Department of CUL. We also have reproductions of manuscript maps held elsewhere. |

**PTO**
The Map Department has some topographic views including a large collection of postcards. We have a large collection of railway maps, plans and diagrams of track layouts, buildings, structures, etc. The Soviet military maps are an important source of topographic information, especially for areas where local mapping is not publicly available. See https://commons.wikimedia.org/wiki/Category:Goad_fire_insurance_maps_of_England. The Map Department has black and white facsimiles of some of these. The originals are in the British Library and colour images can be seen at https://commons.wikimedia.org/wiki/Category:Ordnance_Survey_Drawings.

The Charles Close Society for the Study of Ordnance Survey Maps website and publications are good places to go for more information on OS mapping. www.charlesclosesociety.org/

Aerial Photographs

CUL has some 1:10,560 air photo mosaics produced by OS just after WWII (1944-1950), but only parts of Great Britain are covered. For some urban areas there are also 1:1,250 photographs. CUL has paper copies but they are also available to view on the National Library of Scotland website at http://maps.nls.uk/os/air-photos/. The National Collection of Aerial Photography (NCAP) is a great source of air photos. https://ncap.org.uk/ See also the small selection on CUDL at https://cudl.lib.cam.ac.uk/collections/landscapehistories/1.

Particulars of Sale

These are documents produced when houses / estates etc. were sold. Some are just text – especially the older ones – others include photographs and / or maps. Most are 19th/20th century. We have several thousand of these – look in iDiscover, the card catalogue, and on ArchiveSearch (at https://archivesearch.lib.cam.ac.uk/repositories/2/resources/1180) to find them. See also the blog at https://specialcollections-blog.lib.cam.ac.uk/?p=11824.

Goad Fire Insurance Plans

CUL has only one example of this sort of plan (Liverpool wharves). The British Library Map Library has a comprehensive set and these are available online at https://commons.wikimedia.org/wiki/Category:Goad_fire_insurance_maps_of_England. They also own the archive of Chas E. Goad Ltd 1899-1972 (letter books, correspondence, etc.).

Thematic Mapping & Hydrographic Charts

We actively collect National atlases (they usually include thematic maps, often difficult to obtain elsewhere) and also, where possible, acquire thematic maps (geology, soil, land-use, etc., etc.) plus, for example, linguistic atlases. We also have a large collection of UK Hydrographic Office charts covering all parts of the world.

Key Material Types in the Map Department

| Manuscript Maps | The Map Department has many manuscript maps, some of which are viewable on CUDL https://cudl.lib.cam.ac.uk/collections/maps/1, and there are more in the Manuscripts Department of CUL. We also have reproductions of manuscript maps held elsewhere. |
| **Books** | Libraries and specialist research libraries. In a single search you can discover (some of the) holdings of the UK’s National Libraries (including the British Library) and of many university libraries and specialist research libraries. |  |
| **Views** | Usually, the largest collection of manuscript maps of any locality is in the local record/archives office, and don’t forget about The National Archives in Kew. |  |
| **Town Plans** | Good selection in CUL. Modern town plans are not always catalogued – ask a member of staff. |  |
| **County Maps** | Before the OS got going printed maps tended to be less detailed than we expect today. A list of some ‘large scale’ county maps (often at a scale of 1” to 1 mile; mostly pre-OS; CUL has a good selection) can be found in *The large scale county maps of the British Isles, 1596-1850: a union list*, compiled by Elizabeth M. Rodger and published in 1972 (S696.c.97.39). Because the counties were mapped independently by cartographers, not all counties have been mapped, have the same type of maps and not all are of the same quality. |  |
| **Road Books & Maps** | Road Books are lists of places along roads, with distances and sometimes other information. CUL has a good selection. Roads first appeared on printed English county maps in the late 16th century. Ogilby’s 1675 atlas marked the first systematic survey of British roads. |  |
| **Ordnance Survey (OS) Maps** | With the exception of the oldest, most detailed scales – some 1:2,500 (25”) and 1:500 scale maps from the late 1800’s – CUL should have a copy of every OS map ever published. There are exceptions but we do have a lot of them! Some OS maps can also be viewed on the National Library of Scotland’s website at [http://maps.nls.uk/os/index.html](http://maps.nls.uk/os/index.html) and/or [https://maps.nls.uk/](https://maps.nls.uk/). For the most detailed maps there are two numbering systems: County Series (up to WWII) and National Grid (after WWII). For most areas there will be several editions of the maps but the dates may vary widely between neighbouring sheets. The most recent, most detailed maps can only be viewed online in the Map Room. Public libraries may also be able to provide online access to the most recent OS maps for their local area. Or, if you are a student or member of staff at the University take a look at [Digimap](http://digimap.ac.uk/), an online service providing current and historic mapping: [www.lib.cam.ac.uk/collections/departments/maps/digimat](http://www.lib.cam.ac.uk/collections/departments/maps/digimat). The *Ordnance Surveyors’ Drawings*, 1789-c1840, are manuscript maps from which the earliest 1:63,360 (1” to 1 mile) maps were derived. The Map Department has black and white facsimiles of some of these. The original is in the British Library and colour images can be seen at [https://commons.wikimedia.org/wiki/Category:Ordnance_Survey_Drawings](https://commons.wikimedia.org/wiki/Category:Ordnance_Survey_Drawings). The *Charles Close Society for the Study of Ordnance Survey Maps* website and publications are good places to go for more information on OS mapping: [www.charlescloseorganisation.org](http://www.charlescloseorganisation.org/). |  |

The National Collection of Aerial Photography (NCAP) is a great source of air photos [https://ncap.org.uk/](https://ncap.org.uk/) See also the small selection on CUDL at [https://cudl.lib.cam.ac.uk/collections/landscapehistories/1](https://cudl.lib.cam.ac.uk/collections/landscapehistories/1). |
| **Particulars of Sale** | These are documents produced when houses / estates etc. were sold. Some are just text – especially the older ones – others include photographs and / or maps. Most are 19th/20th century. We have several thousand of these – look in iDiscover, the card catalogue, and on ArchiveSearch (at [https://archivesearch.lib.cam.ac.uk/repositories/2/resources/1180](https://archivesearch.lib.cam.ac.uk/repositories/2/resources/1180)) to find them. See also the blog at [https://specialcollections-blog.lib.cam.ac.uk/?p=11824](https://specialcollections-blog.lib.cam.ac.uk/?p=11824). |
| **Goad Fire Insurance Plans** | CUL has only one example of this sort of plan (Liverpool wharves). The British Library Map Library has a comprehensive set and these are available online at [https://commons.wikimedia.org/wiki/Category:Goad_fire_insurance_maps_of_England](https://commons.wikimedia.org/wiki/Category:Goad_fire_insurance_maps_of_England). They also own the archive of Chas E. Goad Ltd 1899-1972 (letter books, correspondence, etc.). |
| **Thematic Mapping & Hydrographic Charts** | We actively collect National atlases (they usually include thematic maps, often difficult to obtain elsewhere) and also, where possible, acquire thematic maps (geology, soil, land-use, etc., etc.) plus, for example, linguistic atlases. We also have a large collection of UK Hydrographic Office charts covering all parts of the world. |
| **Topographic Mapping** | We try to collect for all parts of the world at a scale of at least 1:250,000 though for many areas we have much more detailed mapping. The Soviet military maps are an important source of topographic information, especially for areas where local mapping is not publicly available. See [https://www.sovietmaps.com/](https://www.sovietmaps.com/) for some background information. |
| **Railway Maps, etc.** | We have a large collection of railway maps, plans and diagrams of track layouts, buildings, structures, etc. Mostly listed on ArchiveSearch [https://archivesearch.lib.cam.ac.uk/repositories/2/resources/1181](https://archivesearch.lib.cam.ac.uk/repositories/2/resources/1181). See also the blog post at [https://specialcollections-blog.lib.cam.ac.uk/?p=18766](https://specialcollections-blog.lib.cam.ac.uk/?p=18766). |
| **Views** | The Map Department has some topographic views including a large collection of postcards. |
| **Reference Books** | For example: Books on the history of map making, including those on a specific place; Lists of maps of various areas, e.g. countries, counties, towns; Lists of maps of certain types, e.g. manuscript or town maps (usually of a specific area); Gazetteers; Dictionaries of mapmakers and cartographic terms … |

© Cambridge University Library, Map Department, 15 November 2022
Quick Guide to the Map Room & its Collections

- **Cambridge University Library Map Department** has over 1.3 million maps of all parts of the world dating from the 15th century to the present. We also have atlases, views, gazetteers and books on cartography. We are constantly adding new and older material to the collection.

- Maps are covered by legal deposit so CUL should receive a copy of everything published in Great Britain, though things do fall through the net!

- Only a small proportion of our collection is catalogued online so you need to check [iDiscover](https://idb.lib.cam.ac.uk/index), [ArchiveSearch](https://archivesspace.lib.cam.ac.uk/bodleian) (the University’s archive catalogue), and the Map Department’s [card catalogue](https://www.lib.cam.ac.uk/collections/departments/maps/finding-maps) to find out what we have. For more information on our catalogues see [www.lib.cam.ac.uk/collections/departments/maps/finding-maps](https://www.lib.cam.ac.uk/collections/departments/maps/finding-maps)

  Note that:
  
  - The card catalogue is arranged in one alphabetical sequence by the place covered by the map.
  - Individual maps in atlases and those in map series are not catalogued separately.
  - All of the letters and numbers, plus the punctuation (including hyphens), in classmarks are important!

- There are very few items on open access in the Map Room so for most items you will need to fill in an order form so that staff can fetch the items for you. There is No Borrowing of maps.

- The Map Room is **open for a shorter time** than the rest of the Library – we are not open in the evenings, at lunch time (12.45 to 2pm) or on Saturdays (although pre-ordered items can be transferred to the Rare Books Reading Room).

- You can use your own camera to **take photographs** of items in the collection for private research purposes, but not for publication (and no flash, tripods or camera noise!). The Library’s Digital Content Unit can also make reproductions for you.

- **Pencils only** may be used in the Map Room – no pens! We can lend you a pencil if you forget to bring one.

- To **protect maps** we try not to touch their surface and so place plastic sheets over them when close study is required.

**You might like to know:**

- Before the advent of Ordnance Survey in 1791, mapping was a very local activity often at estate or county level. Some areas are well mapped, others less so. Older maps tend to be less detailed and, the further back you go, more pictorial.

- There are maps in other parts of CUL – most notably in the Manuscripts and Rare Books Departments and in the University Archives – and in other parts of the University, especially the Colleges.

**For More Information:**

- **Ask** a member of staff in person, by phone, letter or email:

---

**PTO**
usually, the largest collection of manuscript maps of any locality is in the local record/archives office, and don’t forget about The National Archives in Kew.

Town Plans
Good selection in CUL. Modern town plans are not always catalogued – ask a member of staff

County Maps
Before the OS got going printed maps tended to be less detailed than we expect today. A list of some 'large scale' county maps (often at a scale of 1" to 1 mile; mostly pre-OS; CUL has a good selection) can be found in *The large scale county maps of the British Isles, 1596-1850: a union list*, compiled by Elizabeth M. Rodger and published in 1972 (S696.c.97.39). Because the counties were mapped independently by cartographers, not all counties have been mapped, have the same type of maps and not all are of the same quality.

Road Books & Maps
Road Books are lists of places along roads, with distances and sometimes other information. CUL has a good selection. Roads first appeared on printed English county maps in the late 16th century. Ogilby's 1675 atlas marked the first systematic survey of British roads

Ordinance Survey (OS) Maps
With the exception of the oldest, most detailed scales – some 1:2,500 (25") and 1:500 scale maps from the late 1800’s – CUL should have a copy of every OS map ever published. There are exceptions but we do have a lot of them! Some OS maps can also be viewed on the National Library of Scotland's website at http://maps.nls.scot/os/index.html and/or https://maps.nls.uk/

For the most detailed maps there are two numbering systems: County Series (up to WWII) and National Grid (after WWII). For most areas there will be several editions of the maps but the dates may vary widely between neighbouring sheets.

The most recent, most detailed maps can only be viewed online in the Map Room. Public libraries may also be able to provide online access to the most recent OS maps for their local area. Or, if you are a student or member of staff at the University take a look at Digimap, an online service providing current and historic mapping: www.lib.cam.ac.uk/collections/departments/maps/digital-maps/digimap

The *Ordnance Surveyors' Drawings*, 1789-c1840, are manuscript maps from which the earliest 1:63,360 (1" to 1 mile) maps were derived. The Map Department has black and white facsimiles of some of these. The originals are in the British Library and colour images can be seen at https://commons.wikimedia.org/wiki/Category:Ordnance_Survey_Drawings

The *Charles Close Society for the Study of Ordinance Survey Maps* website and publications are good places to go for more information on OS mapping www.charlesclosesociety.org/

Aerial Photographs
CUL has some 1:10,560 air photo mosaics produced by OS just after WWII (1944-1950), but only parts of Great Britain are covered. For some urban areas there are also 1:1,250 photographs. CUL has paper copies but they are also available to view on the National Library of Scotland website at http://maps.nls.scot/os/air-photos/. The National Collection of Aerial Photography (NCAP) is a great source of air photos https://ncap.org.uk/ See also the small selection on CUDL at https://cudl.lib.cam.ac.uk/collections/landscapemaps/1

Particulars of Sale
These are documents produced when houses / estates etc. were sold. Some are just text – especially the older ones – others include photographs and/or maps. Most are 19th/20th century.

We have several thousand of these – look in iDiscover, the card catalogue, and on ArchiveSearch (at https://archivesearch.lib.cam.ac.uk/repositories/2/resources/1180) to find them. See also the blog at https://specialcollections-blog.lib.cam.ac.uk/?p=11824

Goad Fire Insurance Plans
CUL has only one example of this sort of plan (Liverpool wharves). The British Library Map Library has a comprehensive set and these are available online at https://commons.wikimedia.org/wiki/Category:Goad_fire_insurance_maps_of_England. They also own the archive of Chas E. Goad Ltd 1899-1972 (letter books, correspondence, etc.).

Thematic Mapping & Hydrographic Charts
We actively collect National atlases (they usually include thematic maps, often difficult to obtain elsewhere) and also, where possible, acquire thematic maps (geology, soil, land-use, etc., etc.) plus, for example, linguistic atlases. We also have a large collection of UK Hydrographic Office charts covering all parts of the world.

Topographic Mapping
We try to collect for all parts of the world at a scale of at least 1:250,000 though for many areas we have much more detailed mapping.

The Soviet military maps are an important source of topographic information, especially for areas where local mapping is not publicly available. See https://www.sovietmaps.com/ for some background information.

Railway Maps, etc.
We have a large collection of railway maps, plans and diagrams of track layouts, buildings, structures, etc. Mostly listed on ArchiveSearch https://archivesearch.lib.cam.ac.uk/repositories/2/resources/1181 See also the blog post at https://specialcollections-blog.lib.cam.ac.uk/?p=18766

Views
The Map Department has some topographic views including a large collection of postcards.

Reference Books
For example: Books on the history of map making, including those on a specific place; Lists of maps of various areas, e.g. countries, counties, towns; Lists of maps of certain types, e.g. manuscript or town maps (usually of a specific area); Gazetteers; Dictionaries of mapmakers and cartographic terms …

Web Sites
